of this survey, should not be confused with the clustering of sets of graphs based on structural similarity; such clustering of graphs as well as measures of graph similarity is addressed in other literature [38,124,168,169,202,206], although many of the techniques involved are closely related to the task of finding clusters within a given graph. As the field of graph clustering has grown quite ...

### **Practical Attacks Against Graph-based Clustering**

Cluster analysis or clustering is the task of grouping a set of objects in such a way that objects in the same group (called a cluster) are more similar (in some sense) to each other than to those in other groups (clusters). ...

### **Improvements on Graph based Clustering Methods - UEF**

In this paper we present a graph-based clustering method particularly suited for dealing with data that do not come from a Gaussian or a spherical distribution.

### **(PDF) A Graph-Based Clustering Method and Its Applications**

In this paper, we present the first differentially private clustering method for arbitrary-shaped node clusters in a graph. This algorithm takes as input only an approximate Minimum Spanning Tree ...

Local and Global Optimization Techniques in Graph-based Clustering Daiki Ikami Toshihiko Yamasaki Kiyoharu Aizawa The University of Tokyo, Japan

### **Local and Global Optimization Techniques in Graph-Based**

The running time of the HCS clustering algorithm is bounded by  $N \times f(n,m)$ .  $f(n,m)$  is the time complexity of computing a minimum cut in a graph with  $n$  vertices and  $m$  edges, and  $N$  is the number of clusters found. In many applications  $N \ll n$ .

### **HCS clustering algorithm - Wikipedia**

We define hereafter the graph-based Exponential mechanism. In the sequel we refer to it simply as Exponential mechanism. The Exponential mechanism rep-
