A system development methodology refers to the framework that is used to structure, plan, and control the process of developing an information system. A wide variety of such frameworks have evolved over the years, each with its own recognized strengths and weaknesses. One system development methodology is not necessarily suitable for use by all projects. Each of the available methodologies is ...

SELECTING A DEVELOPMENT APPROACH

Abstract. Clearly defining, maintaining, and exploiting the system vision is a central prerequisite for successful system engineering. We address the question how the visions are concretized and maintained in information systems evolution.
