Rational Design of Piled Raft - ScienceDirect

The concept of using piled raft foundation is that the combined foundation is able to support the applied axial loading with an appropriate factor of safety and that the settlement of the combined foundation at working load is tolerable.

studies on piled raft foundation system in sandy soil, clayey soil and layered soil. 2. Experimental Studies
Raft foundation on cohesive soil shows excessive settlement, ultimately causes settlement of the structure.
To prevent excessive settlement, use of minimum number of piles below the raft improves the ultimate capacity, settlement and differential settlement of the foundation system. The ...

A Study on Piled Raft Foundation: State of Art - ijert.org

Piled raft foundation is a new concept in which the total load coming from the superstructure is partly shared by the raft through contact with soil and the remaining load is shared by piles through skin friction.
